IDEs : Eclipse,Netbeans

SUMMER TRAINING

Attended Android Application Development workshop conducted by APPETERIA TECHNOLOGIES from 16th June 2014 to 21st June 2014

COLLEGE PROJECTS :

1. Lab 3:

In this Lab 3 while in Confederation College taking up the Web Designing and development course we created this Lab 3 project as a part of our course requirements.

In this lab we created the basic navigation of pages an index page from which jump to and from between pages and then we created a second page as introduction to social media and third page for the demonstration of table and its usage to store data which we projected by storing dummy employee data into the table.

2. Lab 4:

This project named Lab 4 was the part of our course at Confederation college as the part of our course requirements as this Lab4 project was the continuation of Lab 3.

Here we also added some styling elements to modify the existing project.

3. Project 1:

In this Project I created a Dummy Website as the part of our course requirements at Confederation College. Here we created a website showing smooth navigation amongst the pages.

The initial page here displayed the information about the organization, second page we built for signing up if the user is not having an account on the organization's website or else if already a user then they can just sign in into their account.

The third page was for Survey to be done by the users which we took up in order to gather information about people's choices to better work in fulfilling customer needs by an organization.

WORKSHOPS ATTENDED

- Advanced Java workshop
- NS2 workshop
- Android boot camp Firebase
